

BrightEDU™

Managed LED lighting service for education

Brightcore builds energy performance for schools and educational facilities by lowering energy operating costs, while enhancing classroom aesthetics and improving the overall learning environment. We design, install and maintain an LED lighting plan that addresses your school's needs, inside and out, with no capital investment from you.

Save

Immediate reduction in energy costs with zero capital investment

Improve

Smart controls and color options available to enhance learning as well as solutions for outdoor facilities and parking lots

Maintain

Our no-fee comprehensive service agreement eliminates costly maintenance

Why Choose BrightEDU™

Our team is dedicated to designing a system that improves the learning environment while keeping energy and maintenance costs down.
